RECEIVED

APR 01 2002

In The Claims:

Please cancel Claims 90-98.

Technology Center 2100

Please amend Claims 55 and 86.

55. (Amended) A logistics management method for facilitating the process of shipping goods by a shipper via a carrier, said shipper having a computer-implemented client application that has access to a network and which is related to shipping said goods, said client application having a set of rules by which the shipper ships, said method comprising the steps of:

- providing a rate server having a set of rules by which the carrier transports in order to determine data related to shipping the goods;
- providing access to said rate server on said network from the client application such that said rate server is separately located from said client application on said network; and
- communicating the determined data from said rate server to said client application through an interprocess communication mechanism connected to said network and thereby
